Sounds good but don't hesitate as we have a guest room for you. And a last minute decision is fine.

Thanks Sandie – that is very nice of you. I really appreciate you and Jeff's hospitality – as well as your company. If it's ok with you, I'll keep that option in reserve with the primary plan for me to leave and come in late the next morning.

Hi Sandie,

Yes, I plan to attend the reception and will stay for the remainder of the day to participate in the cyber discussion.

As usual, thank you for your excellent work and for including our office!

Joe

Joe,

You have agreed to participate in this afternoon session on Wednesday, November 28th. Here is an update which I already included in the calendar invite.

I have just been informed that GAL will approve our attendance at the evening events – a reception and dinner at the Hay-Adams with Senator Murkowski as speaker. Please let me know as soon as possible if you can attend the reception and dinner as the organizer needs to make arrangements this week.

If possible, I would also ask you to stay for the entire afternoon, which begins at 2:00 pm, not just your own session. so there will be a robust discussion. They seem to have a great interest in the cyber issues. I've attached the latest agenda here.

Please let me know if you have any questions.

Thanks,

Sandie

Here is the draft description of this session:

2:30pm ***"The Resilience of the Grid: Cybersecurity, Physical Security and the Energy Transition"***

Speaker: Joseph McClelland, Director, Office of Energy Infrastructure Security

As generation becomes more decentralized and integrated with transmission and distribution through digital technologies, the risks of cyber-attacks are increasing. As shown by the 2013 attack on the PG&E Metcalf substation in the US, physical security cannot be ignored. What is being done at the federal level to protect against these threats?

2:45pm **Discussion with ETF participants**

Moderator: John Jimison, Executive Director, Americans for a Clean Energy Grid,
USA

Joe,

I left you a phone message about a 30 minute slot for a group of CEOs from Europe (and other areas of the world) who are coming in for an afternoon to hold discussions with senior staff. Comm. Glick will be participating all day. The topic for you is “The Resilience of the Grid: Cybersecurity, Physical Security and the Energy Transition.” There would be 15 minutes of presentation and another 15 minutes for discussion.

The date is Wednesday, November 28th and the time requested is from 2:30 – 3:00. You would also be welcome to join a reception and dinner with them that evening.

(b) (6) can you check to see if Joe is free and if so could you block his calendar, if he agrees?

Thanks,

Sandie
